

Testimonials

I have worked with Greg for over four years on numerous projects and can unequivocally say he is the most competent project manager, developer and information architect I have had the pleasure of working with. Coupled with his high level of competency Greg also has an extremely strong work ethic and a 'no fuss' approach to getting the job done.

Greg Froh worked with Acro Media from 1999 to 2003. During his tenure with us, he was a valued employee. Not just for the level of skill and attention he brought to his work, but also for the ideas he brought to the table as the company was maturing. Greg played a major role in providing company direction.

- Shane Spraggs, Acro Media

Greg is very easy to work with. He is approachable and level headed and seeks to solve problems once and for all instead of using band-aids.

This gentleman has demonstrated a previously unforeseen determination in resolving issues in an extremely efficient manner [...] With every request I have made, I have received a follow up on the quality of resolution. I have not experienced that level of concern or efficiency with previous holders of his position and have been extremely impressed.

Very service oriented. Strong managerial skills and good communication to his team members including coordinating their work/tasks.

He is very technically competent and makes sound business recommendations and decisions. He has demonstrated calm and effective leadership in crisis situations, and earned the respect and confidence of his staff, peers, and customers.

- Peer and supervisory comments, ACD 360° review

I had the pleasure of working closely with Greg for nearly three years at Navigata Communications, while I was a Systems Administrator and he was the manager of their E-Business division. At Navigata, he had a well deserved reputation of being an extremely capable manager: well liked and respected by his direct reports, while at the same time ensuring a high level of productivity. Working with Greg, I found him to be very professional, well organized, and extremely savvy with a multitude of technologies and IT methodologies. His written and verbal communication skills are better than most.
